

Community Update

TEMORA BATTERY ENERGY STORAGE SYSTEM

THE PROJECT

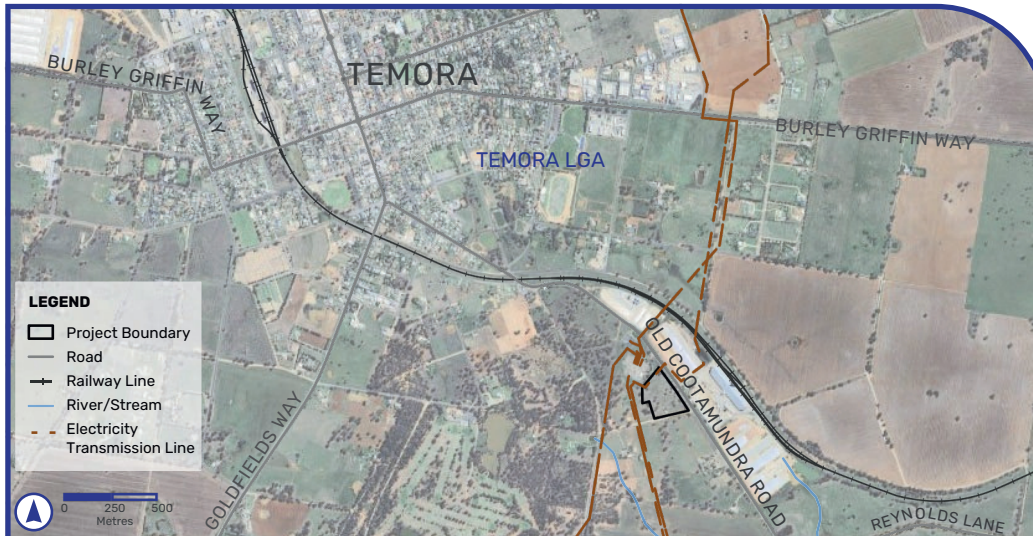

North Harbour Clean Energy Pty Ltd (NHCE) is progressing plans to develop a Battery Energy Storage System in the Shire of Temora.

The battery will assist in matching electricity supply from renewable sources to consumer demand, by storing electricity during periods of excess supply for use during periods of high demand. The exact layout and design of the battery will be developed over the coming months based on engineering design, technical studies and upcoming community and stakeholder engagement, which will be carried out as part of the Environmental Impact Statement (EIS) for the project.

LOCATION

The project site is located at the corner of Old Cootamundra Road and Miners Street, Temora (see map below) around 1 km southeast of town. The site area is approximately 3.6 hectares.

This site is well placed for a battery energy storage system as it is close to existing electrical infrastructure and other nearby industrial and commercial land uses.

ABOUT US

NHCE is dedicated to developing, owning, and operating a portfolio of energy assets, with a focus on energy storage to deliver on-demand clean energy.

We have a portfolio of energy storage projects across NSW currently in their planning and assessment stages.

WHERE ARE WE UP TO?

We have completed the scoping phase for the project and are now preparing an EIS, which we expect to take around a year to complete. This involves a range of detailed assessments to assess environmental impacts, such as biodiversity, noise, traffic, visual amenity, Aboriginal and European heritage, water, social and economic factors.

As part of this process we will be consulting with the community and interested parties to ensure local perspectives inform the project planning and assessment.
